Schedule of the LTP Thursday Colloquia
Fall Semester 2011

PSI, WHGA Auditorium, 16:00

December 1, 2011

Date	Speaker and Title	Host
22.9.	**R. Durrer** (University of Geneva): What Do We Really Know About Dark Energy?	S. Actis
13.10.†	**E. Hinds** (Imperial College London): nEDM	P. Schmidt-Wellenburg
27.10.	**A. Rubbia** (ETHZ): Indication of Electron Neutrino Appearance in the T2K Experiment and its Long-term Implications	G. Chachamis
3.11.	**E. Casarotti** (INGV, Italy): Earthquake: Wobbles and Waves	G. Chachamis
10.11.*	**J. Nowak** (University of Minnesota): NOvA Experiment	S. Actis
17.11.	**R. Wallny** (ETHZ): CMS - The First Two Years	G. Chachamis
24.11.	**N. Beisert** (ETHZ): Solving Gauge and String Theories with Integrable Spin Chains	G. Chachamis
1.12.	**J. Jochum** (University of Tuebingen): Direct Dark Matter Searches and Recent Results from the CRESST Experiment	S. Actis
8.12. **	**U. Baltensperger** (PSI): Is There a Link Between Galactic Cosmic Rays and Clouds? The CLOUD Experiment at CERN	S. Actis
15.12.**	**O. Bertolami** (University of Porto): The Thermal Analysis of the Pioneer Spacecraft and the Anomalous Acceleration	S. Actis

† on this day the colloquium starts at 14:00
∗ on this day in room E6 of building OSGA
∗∗ on this day in room 019 of building WBGB
