Schedule of the ETH/PSI Friday Colloquia
Summer Semester 2002

PSI, WHGA Auditorium, 16:00

May 27, 2002

Date	Speaker and Title	Host
05.04.	**P. Truöl** (Univ. Zürich): New experimental results on rare and forbidden K decays	R. Rosenfelder
12.04.	**V. Zacek** (Univ. Montreal): Status of the Search for Dark Matter and the PICASSO project	K. Gabathuler
19.04.	**G. Hasinger** (MPI Munich): Observation of the early universe with the X-ray satellites Chandra and XMM-Newton	Ph. Jetzer
26.04.	**Ch. Regenfus** (Univ. Zürich/CERN): Production and detection of cold Antihydrogen	D. Kotlinski
03.05.	**H. Rauch** (Atominstitut Wien): Test of Quantum Mechanics with Neutrons	M. Daum
17.05.	**M. Lüscher** (CERN): Lattice QCD — from asymptotic freedom to quark confinement	A. Denner
24.05.	**T. Wenaus** (CERN): Software and Computing at the LHC	M. Melles
08.06.*	**P. Mättig** (Univ. Wuppertal): Will the Higgs be detected before LHC? Status and prospects of experiments at the Tevatron	A. Denner
14.06.	**D. Helbing** (Univ. Stuttgart): Traffic Jams, Pedestrian Flows, Escape Panic, and Optimal Production: New Insights from Many-Particle Physics	R. Rosenfelder
21.06.	**U. Maurer** (ETHZ): Cryptography: theory, applications and the role of physics	S. Droz
28.06.	**D. Wyler** (Uni Zürich): Recent developments in B physics	M. Melles
05.07.	**P. Debevec** (Univ. of Illinois): The BNL g-2 experiment: recent results and future prospects	K. Gabathuler

∗ on this day in room E26/E28 of building WLGA
