Schedule of the LTP Friday Colloquia
Winter Semester 2000/2001

PSI, WHGA Auditorium, 16:00

January 24, 2001

Date	Speaker and Title	Host
27.10.	**A. de Rujula** (CERN): γ-Ray Bursts: a Mystery being resolved?	A. Denner
3.11.*	**F. Ravndal** (Oslo): Effective Field Theories of Everything	R. Rosenfelder
10.11.	**H. Gäggeler** (PSI/Bern): New Results from the Heavy Element Research	A. Denner
17.11.	**K. Danzmann** (Hannover): Gravitational Wave Detectors on the Earth and in the Heavens	E. Morenzoni
24.11.†	**A.I. Frank** (Dubna): Optics of Ultracold Neutrons: current state and some perspectives	M. Daum
1.12.	**A. Weis** (Fribourg): Search for T-violation using alkali atoms in a He-crystal	F. Kottmann
8.12.	**G. Soff** (Dresden): QED in Strong External Fields	S. Dürr
15.12.	**J. Schmiedmayer** (Heidelberg): Optics and Interferometry with Atoms and Molecules	M. Daum
12.1.	**T. Montmerle** (Saclay): High-Energy Phenomena in Regions of Star Formation	M. Güdel
19.1.	**M. Mayor** (Genf): Extrasolar Planetary Systems	Ph. Jetzer
26.1.	**P. Janot** (CERN): 11 Years of LEP	M. Melles
2.2.	**M. Beneke** (Aachen): CP Violation: Mystery, Triviality or Opportunity?	A. Denner
9.2.	**R. Frosch** (ETHZ): New ideas on the old subject of musical consonance	

* on this day in room E26/E28 of building WLGA
† on this day in room 108 of building WSLA
